4 APR 1974

MEMORANDUM FOR: Director of Medical Services

SUBJECT: Personality Studies

1. At the meeting on 11 April we propose to discuss the attached listing of candidates for personality studies (Tab A). The list has been compiled after discussions with principal customers in the Intelligence Community. At the meeting we should like to have your views on the appropriateness of this group of studies along with indications of any on which you might be able to provide assistance as drafters or contributors. You may wish also to recommend additions to the list based on your knowledge of needs or, conversely, deletions.

2. As a result of our liaison with people in International Security Affairs (ISA) in the Department of Defense, they have sent us a list of studies prepared by the Psychiatric Staff which they have not received officially but would like to have sent to them (see Tab B). If you have no objections to doing so, I think it would be appropriate to accede to their request. If we can assist in this distribution, let me know.

25X6

3. Lastly, in dealing with the Policy Planning Staff (PPS) in State, their interest in a study of [REDACTED] prepared by the Psychiatric Staff but classified Internal Use Only was made known to us. We believe that the restriction on the dissemination of the study could now be removed so as to make it available to them. If you agree, a copy should be sent to Director, PPS.

4. We look forward to the meeting on Thursday.

25X6

[REDACTED]

KARL H. WEBER
Director
Scientific Intelligence
